

# Application Transformation Cockpit

Powering your cloud transformation from beginning to end

**Txture is a cloud transformation and application portfolio solution** providing guidance and support across all transformation phases. With its knowledge base of over 400k cloud services and a large set of assessment rules, Txture's Application Transformation Cockpit increases transformation speed while reducing costs and associated migration risks.

Txture serves as a single source of truth for hybrid cloud landscapes, providing essential transparency regardless of deployment location or cloud provider on the entire cloud journey.

The software is designed for:

- Cloud Center of Excellence
- Cloud Providers
- System Integrators

## Key Use Cases

### Cloud Application Readiness & 6R Assessment

Evaluate applications and their technology stack on cloud readiness, cloud business value, and migration risk to make informed 6R migration decisions.

### Cloud Solution Architecture Comparison

Create solution architectures with selected cloud providers for your preferred migration strategies, such as replatforming, containerization, or SaaSification.

### Data Collection

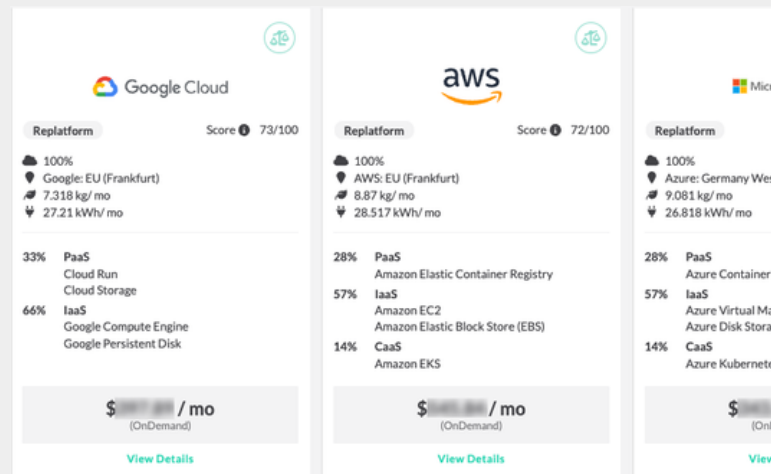

Streamline data collection and speed up the mapping of your IT estate.

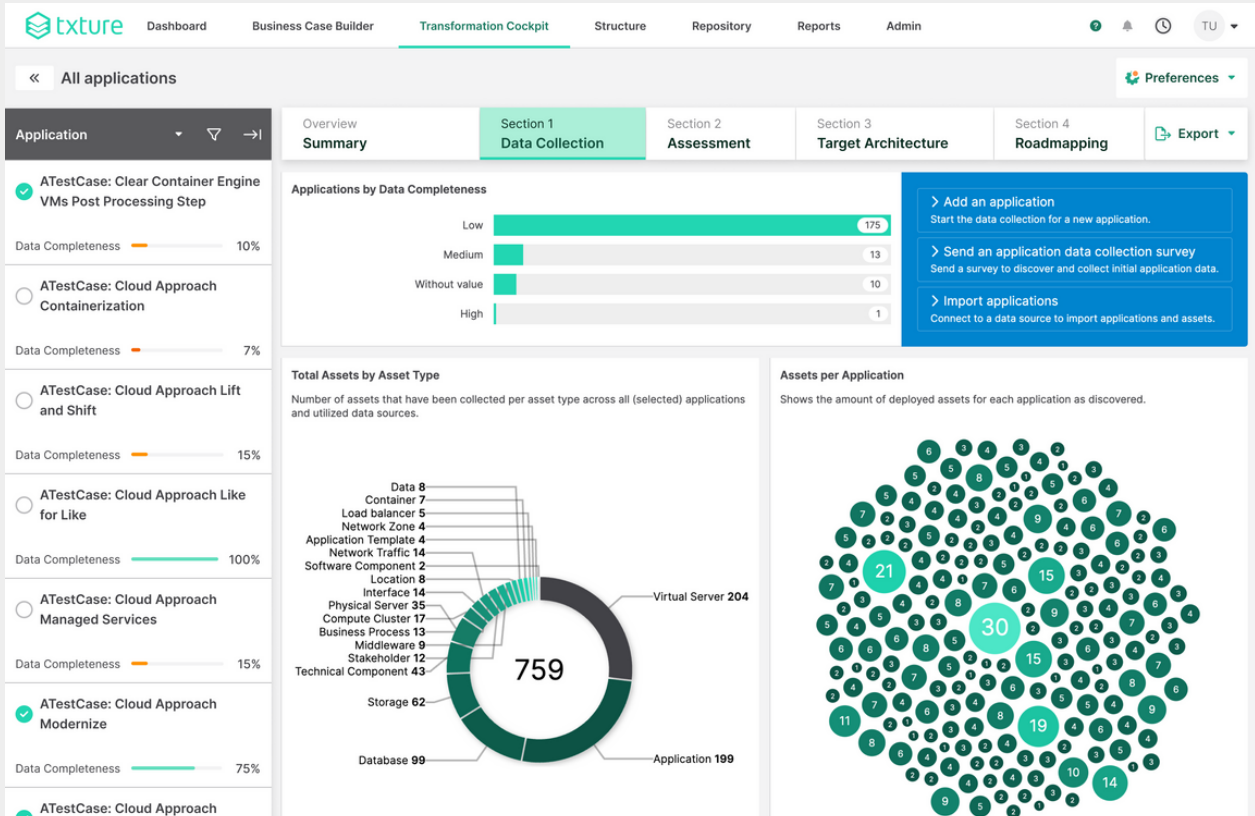

### Green Cloud Assessment

Assess your IT's carbon footprint and rebuild your cloud portfolio to reduce CO2 emissions.

## Key Product Information

- Cloud knowledge base of 400k+ cloud products, 15 cloud providers
- Provider-neutral
- Deployment as Software-as-a-Service (SaaS) or on-premise
- Application-based monthly licensing

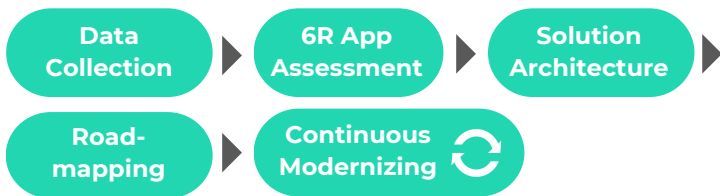

### How does it work?

Ttexture analyzes existing IT landscapes in order to identify and implement the right migration and modernization approach (6Rs). The software takes each application's business, security, compliance, and technical requirements into account.

Covering the entire cloud transformation journey:

Ttexture's cloud knowledge engine calculates your cloud readiness score, migration recommendations, and solution architectures based on your own cloud strategy. During and after the transformation, Ttexture reports transformation progress and helps you to manage and (cost) optimize your multi-cloud and hybrid IT portfolio.

### Benefits

- Migration risk reduction
- Cost saving potentials
- Increased transformation speed
- End-to-end standardized process
- Cloud compliance & sustainability
- Cloud strategy alternative analysis
- Unified solution
- Clear cloud modernization steps
